Small Breaks

Reimagining an IL Course through the Lens of
Critical Digital Pedagogy

Hello & Outcomes

In this session...

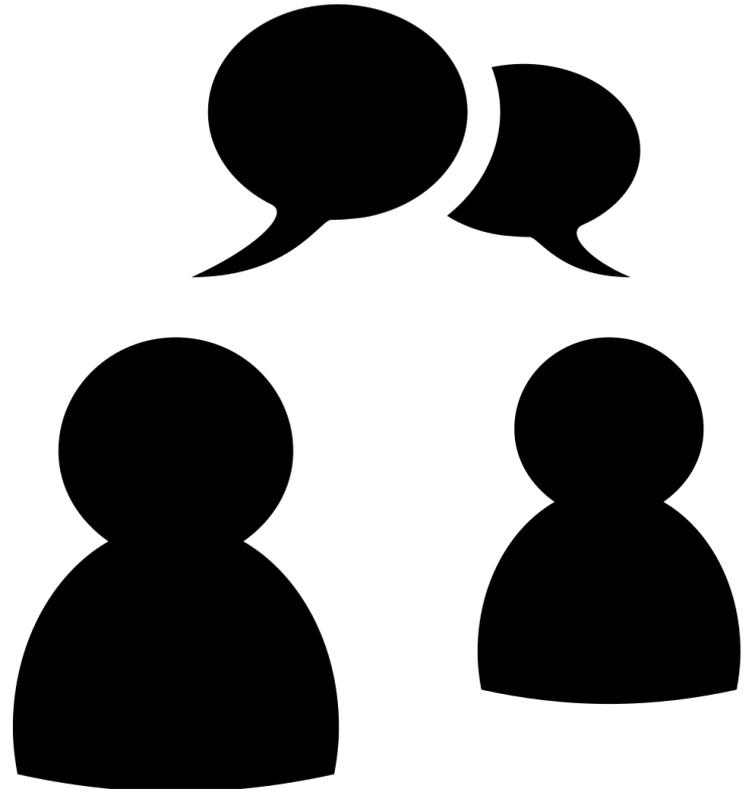

- Key components of critical digital pedagogy
- Background
- Tools for interaction
- Assignments

Andrea Brooks (she/her)
Pedagogy & Assessment

Critical Digital Pedagogy

“It’s the pedagogue who looks for new ways to inspire active learning in a classroom...who encounters an LMS and decides to break it instead of simply reside within it.”

Critical & Digital Pedagogies

- *Critical* pedagogy aims for action and social justice
- Power structures (teacher-student)
- Dialogue & collaboration
- *Digital* pedagogy aims for thoughtful integration of technologies in a classroom

Background

- Educator Learning Community
 - Can reflective dialogue flourish online?
 - How can digital tech deconstruct role of teacher and student
 - How do we create intrinsically motivating spaces?
- LIN 414: Advanced IL
 - 7 weeks, three credits
 - Scaffolding from 100-level IL course
 - Critical information literacy

AN URGENCY OF TEACHERS

the Work of Critical Digital Pedagogy

Sean Michael Morris
Jesse Stommel

[An Urgency of Teachers: The Work of Critical Digital Pedagogy by Sean Michael Morris and Jesse Stommel](#)

CDP and LIN 414

Critical digital pedagogy...

- Is centered on community and collaboration
- Emphasis on dialogue
- Co-authoring the learning space
- Humans first, tools second
- Embraces problem-solving and student agency

Learning Outcomes

1. Reflect on the impact of key information literacy concepts in personal and professional contexts
2. Critique the value and limitations of open and commercial resources
3. Identify and effectively use open and commercial research resources for professional and personal research needs
4. Apply information literacy knowledge to a teaching or programming scenario
5. Evaluate diverse information sources by considering various types of bias, authority, and context of the source
6. Map the conversation and gaps surrounding a topic relevant to information literacy

CDP in Action

Small breaks

- **Dialogue/interaction**
- Make connections
- Students as authorities

Dialogue: Social Annotation

Perusall

“And when each of us steps behind any podium, we are positioned to be listened to, when really we need to be listening.” -Morris

Information Has Value

Information possesses several dimensions of value, including as a commodity, as a means of education, as a means to influence, and as a means of negotiating and understanding the world. Legal and socioeconomic interests influence information production and dissemination.

The value of information is manifested in various contexts, including publishing practices, access to information, the commodification of personal information, and intellectual property laws. The novice learner may struggle to understand the diverse values of information in an environment where “free” information and related services are plentiful and the concept of intellectual property is first encountered through rules of citation or warnings about plagiarism and copyright law. As creators and users of information, experts understand their rights and responsibilities when participating in a community of scholarship. Experts understand that value may be wielded by powerful interests in ways that marginalize certain voices. However, value may also be leveraged by individuals and organizations to effect change and for civic, economic, social, or personal gains. Experts also understand that the individual is responsible for making deliberate and informed choices about when to comply with and when to contest current legal and socioeconomic practices concerning the value of information.

KNOWLEDGE PRACTICES

Learners who are developing their information literate abilities

- give credit to the original ideas of others through proper attribution and

Current conversation

? Information as a means to influence can include fake news or information that might otherwise be viewed as categorically false. As a result, two spheres of influence seem to emerge: one where fact is revered, the other where false information and lies is accepted as reality

Oct 21 3:42 pm

? I have noticed that false information like the information on medical procedures is being taken more seriously then it should in some circles. It is unfortunate that in this age of "free" access to information that false information has come to influence so many people.

Oct 21 4:13 pm

? Fake news and misinformation is a pitfall in our society, especially when it has anything to do with medical procedures or general health. This past year (almost 2 years now) especially, since the covid-19 vaccine came out there is so much

Comments

“Him talking about how he needs access to academic research but can't afford it **just illuminated** an important component of this for me-- the purpose of information...I have to question whether information has value if it cannot be used to complete a goal.”

“Not everyone sees eye-to-eye, especially when it comes to information. We exist as individuals within a community, whether we are conscious of it or not. **Information can definitely be perceived differently based on the format it is presented in and packaged.**”

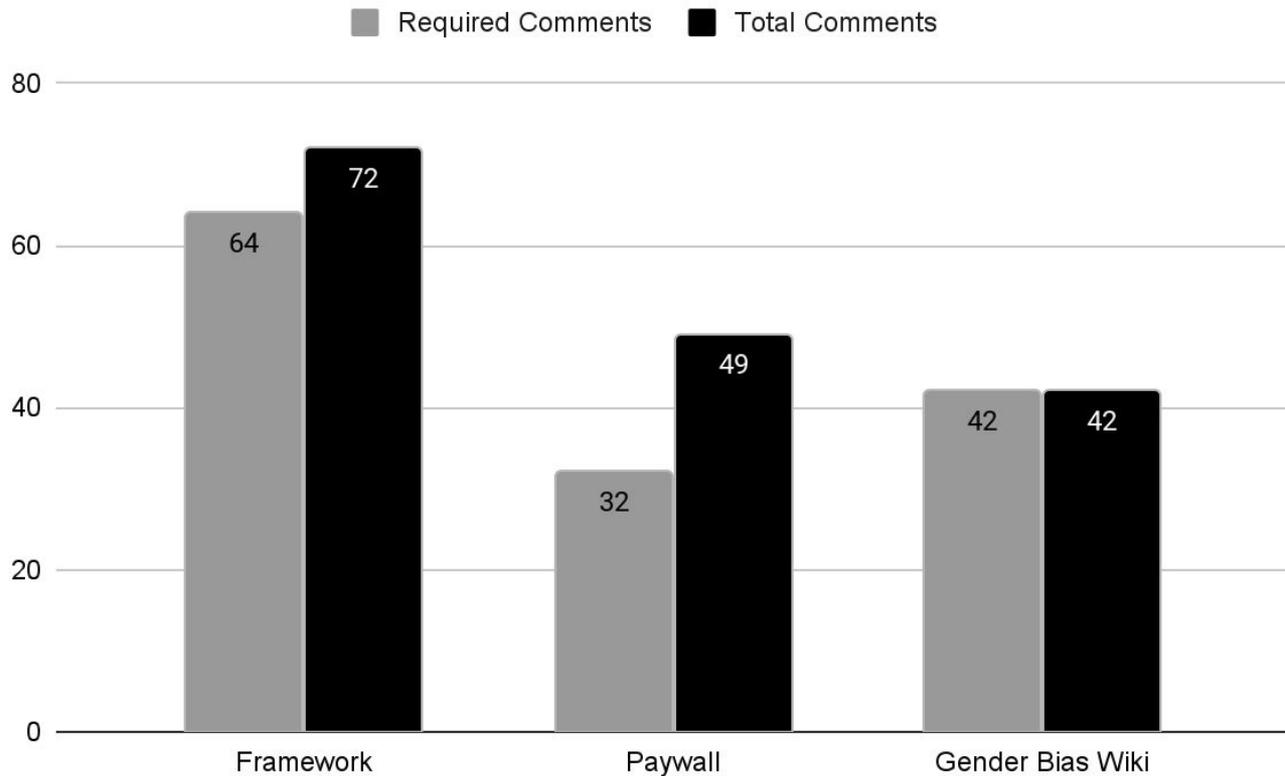

“If one feels harassed, unsupported, or cannot see others like them in leadership positions, one will be less likely to create and contribute content. **Diversity in knowledge creation will be inhibited.**”

Comments

“This idea that our own collegiate research is limited by what we have access to is incredibly timely for me. I am starting my **Honors Capstone** and one of the requirements early on was to read and research everything we could to determine the realm of our research project/question. Something that a lot of people struggled with in my class was finding data that they could access pertaining to topics they were interested in...”

“I am taking **English 371**. This is a topic in that course. The textbook still maintains "he or she" as an acceptable alternative. My instructor supports the **updated approach of using "they" or "their" when gender is not known. This would lead one to favor "scientist" over "female scientist" or "male scientist"**

Assignment: Making Connections

Visual Literature Review

- Aiming for students to make more meaningful connections between sources - and their inquiry
- Mindmeister
- Some guidelines provided, but students presented the maps in a way that made sense to them

Student Example 1

What are measures you can take to protect your online personal information and privacy?

Protecting Online Privacy

Boerman, 2021

<https://journals.sagepub.com/northernkentuckyuniversity/idm.oclc.org/doi/pdf/10.1177/0093650218800915>

This study investigates the reason as to why people pursue measures for protecting online privacy as well as the base methods in which they go about doing so such as deleting cookies and browser history but ultimately concludes that people should be further educated on methods to protect their privacy as well as the severity and risks that come with not doing so.

Suncorp, 2021

<https://www.suncorp.com.au/learn-about/security/online-privacy.html>

This article explores reasons and methods to go about protecting online privacy such as protecting your identity and financial security using methods like installing virus protection software, two-factor authentication and developing an awareness for various types of internet scams.

Schiffer, 2019

<https://www.vox.com/the-highlight/2019/9/11/20859597/internet-privacy-trace-history-google-facebook>

This article explores reasons and methods to go about protecting your online privacy through more social reasons and intentions like interacting through social media and seeing if your personal information can be quickly reached through methods like a simple google search.

Klowski, n.d.

<https://www.nytimes.com/guides/privacy-project/how-to-protect-your-digital-privacy>

This article explores methods that you can adopt to protect your online privacy but is formatted in a way that also provides example resources that you can use yourself. It also goes into detail explaining why you should adopt methods and behaviors for protecting your online privacy that it makes example and how you can do it.

Populations and Online Privacy

What populations have a demand for Online Privacy?

Many groups use the internet for a variety of reasons whether for recreational, personal, or educational reasons in the age of information access to the internet becomes more and more important and different groups and demographics will often apply their own methods of protecting their online privacy.

Desimpelere, 2020

<https://doi-org.northernkentuckyuniversity/idm.oclc.org/10.1016/j.chb.2020.106382>

This study is the same as mentioned previously but is being looked at through a different lens such as the focus and importance of teaching online privacy protection and computer literacy to children and developing these skills in the adolescent population.

Youn, 2005

<https://ebs.sagepub.com/northernkentuckyuniversity/idm.oclc.org/doi/pdf/10.1177/0093650205274848>

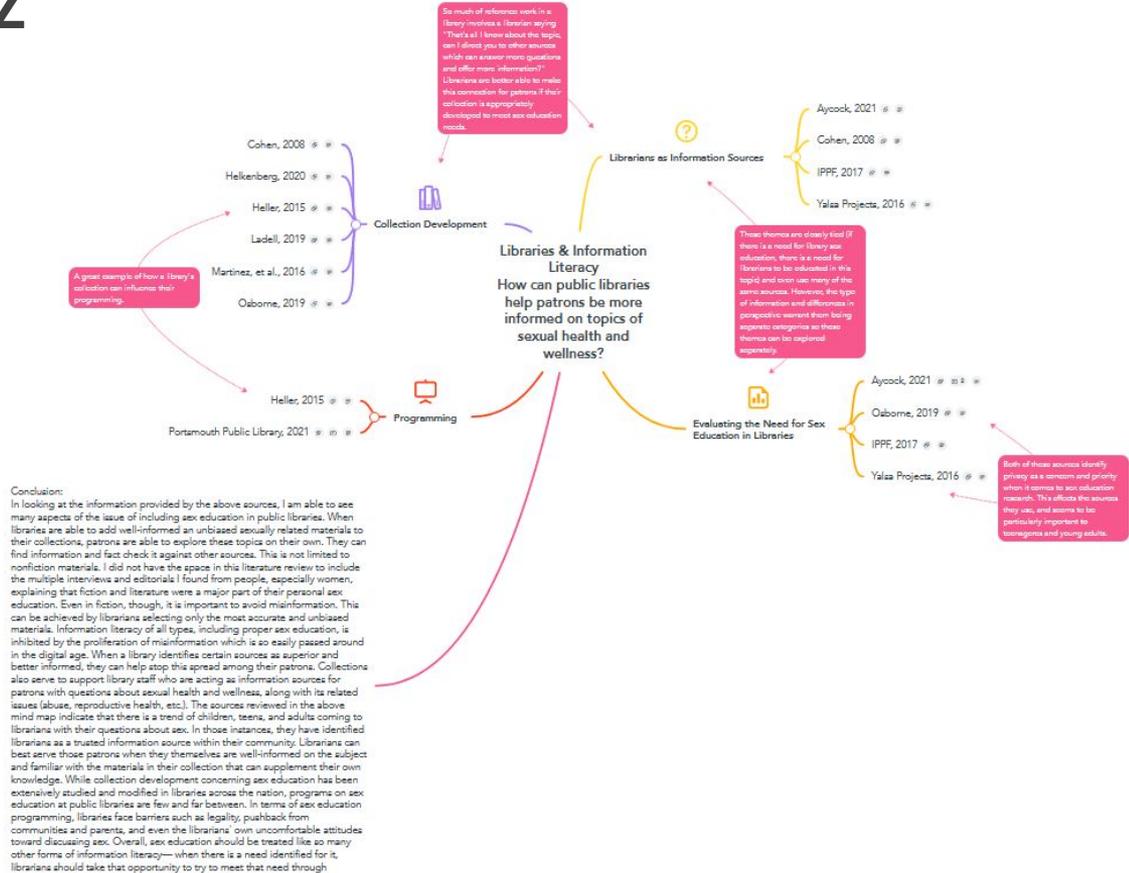

This study explores the relationship between the teenage population and the internet, often specifically focusing on the dynamic between teens and an online market, methods that teenagers have taken to protect their online privacy, and how their growing demographic attracts corporate attention and desire for data and information.

Conclusion

Privacy literacy is a complicated topic. It isn't as simple as deleting cookies every once in awhile, its complex and there are as many reasons and methods for you to take to protect your Online Privacy as there are ways and systems for individuals, groups, corporations, and institutions to subvert it.

Privacy is considered very much a personal freedom and as such it is important for the individual to be

Student Example 2

Assignments & Audience

- Using tools that take students outside the LMS
- Using tools that also mimic work in the world
- Shifting the audience for assignments

“The best online courses – the best courses of all types – ask students to do work in the world.” – Stommel

Student Authorities - 2 Examples

— — —

You have been asked to give a presentation at your public library for a specific audience.

The audience can be local teachers, health professionals, or business owners (you pick).

These individuals are not affiliated with a university so they can't connect to an academic library and you should assume they are not familiar with the term "open access."

You will develop a slide deck to explain open access and highlight five resources you would recommend for your group and why.

In addition make sure to consider the information privilege of your audience and consider how that might impact their information needs.

The purpose of this assignment is to show off your searching hacks and expertise by creating an infographic. No matter your future profession, you will be using online search tools for all types of needs. And, if you end up working in a library or within the broader information industry, you might find yourself teaching others how to use search tools to their advantage. The main point of your infographic should be to teach your audience how to search a particular tool or groups of tools. You will select one tool (or a group of related tools) to showcase. This assignment will also give you experience creating an infographic, which is a great way to practice condensing a lot of information into a readable and digestible format.

Considerations

“We need to recognize that the best learning happens not inside courses, but between them” - Stommel

- Requirements for posting
- Too much unfamiliarity
- Reflection
- Assignments and audience - work in the world
- Participant Pedagogy

Q&A
