

# Sustainable Innovation for Library Instruction Programs Roadmap

**What one (1) topic or trend do you want to focus on today?**

*Reflect on potential barriers and opportunities to incorporate this trend into your library instruction program.*

**The Leaves: What is your most ambitious plan?**

*Imagine there are no limits to time, budget, labor, or other constraints. Reflect on your pie in the sky ideas.*

**The Stalk: What is your more realistic plan?**

*What can you actually accomplish given your constraints? Who can you partner with to share the workload? If you're not an expert on this topic, how will you gain necessary knowledge to accomplish your plan?*

**The Soil: How does this plan align with your mission/values?**

*Reflect on your personal and institutional priorities. How will you continue to meet students' immediate research needs while putting this plan into action?*
